Skills

- Python, Java, C++
- Django, Flask, Hugo
- SQL, Mongo, Firebase
- Git, CI/CD
- Docker, Compose
- Linux, Debian, Arch
- PLC, Electrical
- Automation, Controls

Projects (clickable)

- RiskWatch ★
- Personal Website
- Bullseye Buddy
- Minecraft Watchdog
- HawkPhish
- WiFiWalrus

Languages

- English
- Lithuanian

About Me

Recent Computer Engineering graduate with hands-on experience in software development, backend systems, and embedded design. My master's degree specializes in networking and telecommunications, with a focus on real-world engineering applications. I am passionate about leveraging technologies, including AI, to drive innovation and solve complex technical challenges. Visit my personal website to explore my projects and technical journey.

Field Service Engineer — Sep '25 - Present

QuadPlus

- Execute turnkey commissioning, modernization retrofits, and emergency field troubleshooting for industrial machinery across metal processing, paper, and heavy manufacturing sectors.
- Configure, tune, and service multi-vendor drive and control platforms across ecosystems like Rockwell, Siemens, ABB, AutomationDirect, and more.
- Refactor control logic, safety interlocks, and operator interfaces to resolve complex intermittent faults and ensure stable line throughput.

Site Reliability Engineer Intern — Apr '23 - Jul '23

Nord Security

- Optimized backup scripts for production systems and automated database workflows using shell scripts and cron jobs
- Collaborated with frontend teams to update Django services on our servers that would transition properly between QA and PROD environments
- Worked with Grafana, Ansible, Teleport, and Docker to complete tasks

Education

Bachelor of Computer and Cybersecurity Engineering — '20 - '25

Illinois Institute of Technology

Master of Science in Computer Engineering — '22 - '25

Illinois Institute of Technology
