About Me

Field service and automation engineer with a Master's in Computer Engineering (specializing in networking) and extensive plant-floor experience across food, chemical, paper, and plastics manufacturing. Experienced in commissioning multi-vendor control systems, integrating sensors, and setting up industrial IT/OT networks in live facilities. Focuses on diagnosing machine failures at the root cause, walking plant teams through the fix, and setting up practical preventive maintenance for the future. Builds customer trust and uncovers new project opportunities by deeply understanding the equipment and proving results on the floor.

Field Service Engineer — Sep '25 - Present

QuadPlus

- Execute turnkey commissioning, modernization retrofits, and emergency field troubleshooting for industrial machinery across chemical, metal processing, paper, and heavy manufacturing sectors.
- Configure, tune, and service drive and control platforms across ecosystems like Rockwell, Siemens, ABB, AutomationDirect.
- Refactor control logic, safety interlocks, and HMIs to resolve complex intermittent faults and ensure stable line throughput.
- Architect and troubleshoot plant-floor communication networks (Profinet, Profibus, Ethernet/IP, fiber optics, and industrial wireless radios), collaborating with plant IT/OT teams on IP addressing, subnet routing, and remote VPN/cloud connectivity.

Electrical Engineer — Jan '24 - Aug '24

H.B. Taylor Co.

- Engineered, maintained, and upgraded electrical and industrial automation systems for a commercial food and beverage manufacturing facility specializing in liquid and dry flavors.
- Programmed and maintained AutomationDirect PLCs, HMIs, and VFD motor controls governing large-scale industrial mixers, blending tanks, and boilers.
- Utilized AutoCAD Electrical to design and update schematics, integrating sensors and scales to streamline batch line troubleshooting.

Education

Bachelor of Computer and Cybersecurity Engineering '20 - '25

Illinois Institute of Technology

Master of Science in Computer Engineering '22 - '25

Illinois Institute of Technology
